

Come onboard  
and scope with us!

Presenting SEAWise at MEDAC

SEAWise has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101000318

# What's the SEAWise

aim?

Paving the way for the effective implementation of Ecosystem Based Fisheries Management in Europe

Working as a **collaborative network**, SEAWise delivers a **fully operational approach** for stakeholders and policy makers to easily apply **Ecosystem Based Fisheries Management** in their own fisheries.

Enhancing the value of fisheries for the benefit of all, SEAWise will **create tools and advice for collaborative management** under environmental change and increasing competition for marine space.

Practical  
insights.  
Applicable  
tools.  
Ecosystem  
based  
management.

# What will we do?

We will work with our stakeholder network to establish clear priorities, a common knowledge base and characteristics of ready-for uptake advice addressing our 4 aims

1.  
Build a  
network of  
stakeholder  
s

2.  
Assemble a  
new  
knowledge  
base

3.  
Collate,  
develop and  
integrate  
predictive  
models

4.  
Provide  
ready-for-  
uptake  
advice

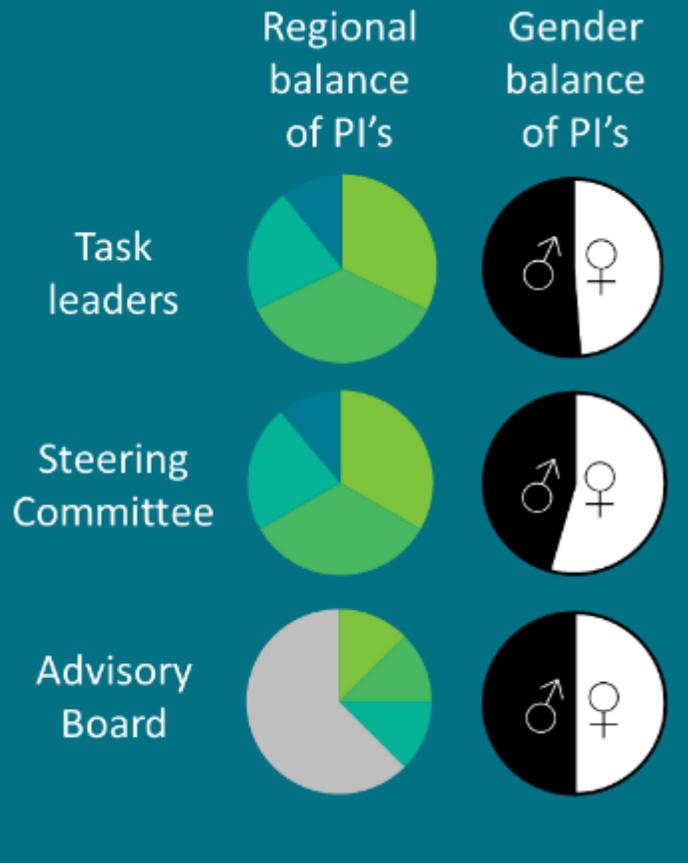

A dynamic, collaborative network is  
key to the success of SEAwise.

It only works if you feel it  
is worth your while!

# 24 partners. 8 mio €. 4 regions. 1 advisory board. 1 approach

## Full Partners

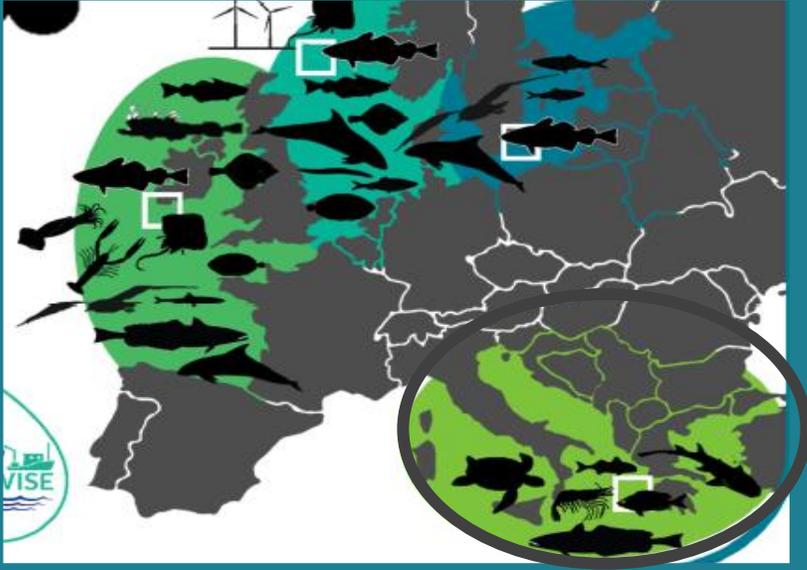

DTU Aqua (coordinator), Ifremer, AZTI, MI, COISPA, HCMR, Mindfullywired (MWC), ICES, Ti, ILVO, WMR/WEcR, SMRU, Cefas, CAU, CBG-AAU, ATHENA, UBO, Agrocampus, University of Tartu, BIOR, University of Strathclyde, CEPESCA, Politecnico di Milano, WUR

## Advisory Board

Ernesto Penas-Lado, Mark Dickey Collas, Elisabetta (Bee) Morello, Javier Garat, Martin Pastoors, Antonia Leroy, Magaret (Peg) Brady, Athanassios Tsikliras, Eva Plaganyi

**24**  
European partners and an Advisory Board with key experts

# What are we working on?

Co-design an effective and socially acceptable governance for the Adriatic Ionian region accounting for its peculiar traits, linked to:

- ✓ high biodiversity;
- ✓ stocks productivity;
- ✓ relevance of small-scale fisheries;
- ✓ large scale mixed fisheries and fleets' interactions;
- ✓ sensitive and essential fish habitats;
- ✓ impacts on species and habitats;
- ✓ climate change-linked risks;
- ✓ management measures in place (MAP, GFCM Recommendations).

## How?

- ✓ collating all the available information (structured review) and data;
- ✓ scoping workshops, interviews with fishers and stakeholders;
- ✓ developing/applying biological, economic and social indicators for the region;
- ✓ developing/applying ecological, spatial, bio-economic, MSE modelling for predictions;
- ✓ evaluating the outcomes of co-designed social and ecological predictable management strategies.

**The  
Mediterranean.**

# What would participating in the network entail?

SEAwise network participant(s) within MEDAC are invited to the four SEAwise co-design workshops:

Today: Stakeholder scoping of key ecosystem priorities and measures

Spring 2021: Presenting the scoping results in MEDAC

Spring 2023: 1<sup>st</sup> presentation of management strategy evaluation results

Autumn 2024: 2<sup>nd</sup> presentation of management strategy evaluation results

Spring 2025: Synthesis and advice demonstration in Brussels

We also hope you will attend the SEAwise/ICES/GFCM workshops to determine best approaches to EBFM in autumn 2023 and winter 2025.

Between these meetings, “expert advice users” are invited to comment on key priorities and formats for advice, welcome us to your meetings, attend online meetings, or participate in specific interviews.

**End-user  
driven  
advice**

The true experts on the usefulness of advice  
are the recipients.

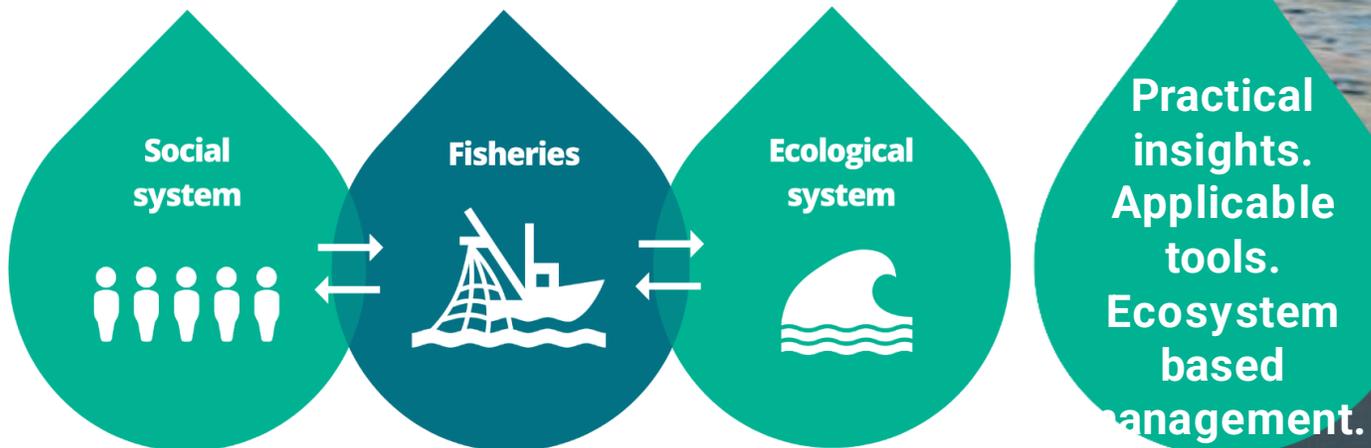

We need your input to help us build a foundation of knowledge, and target our work on advice that is meaningful to end users.

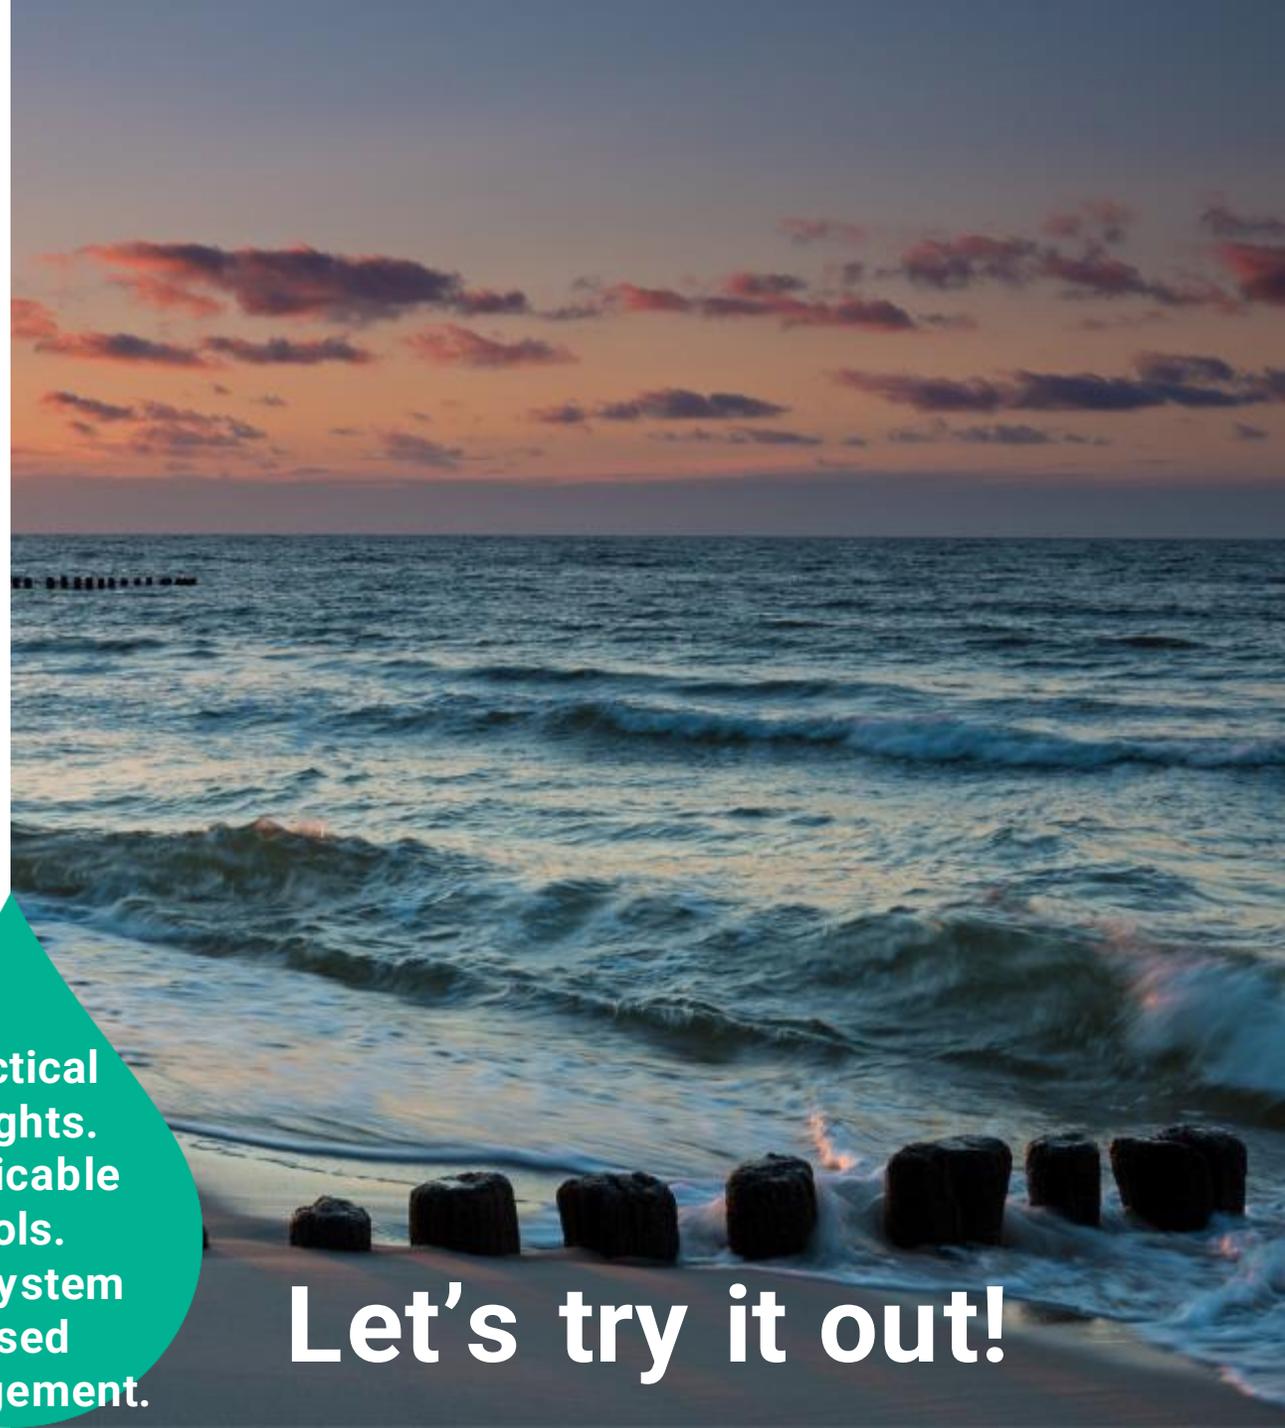

# How do I contribute to the scoping and why?

We'd like your help to determine what the most important components are in ecosystem based advice for social and ecological systems and how they interact.

There are no wrong answers – it is all about finding out what you and others think is important

**Let's try it out!**

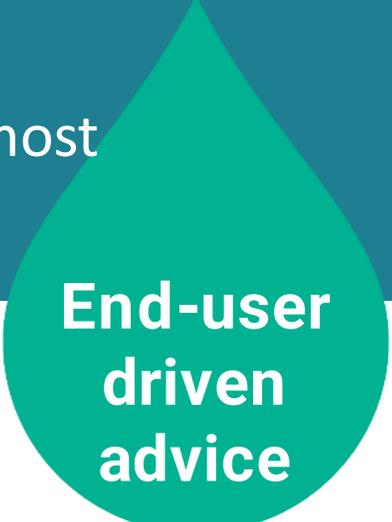

slido

**Which vegetable do you not like?**

① Start presenting to display the poll results on this slide.

# How do I contribute to scoping?

- Think about your ecosystem and select one of slides 4-7.
- Think about who you are. Do you self-identify most as scientist, NGO, industry or interested citizen? Write the reply on the slide.
- Think about the things in your ecosystem. Make a list of items that you would like to get ecosystem based advice on for this ecosystem.
- Put these items onto your map as text boxes or pictures from slide 8. Alternatively, draw on paper and take a photo. If using icons, please write a text box stating what they mean.
- Choose arrows to show the connections between the items you consider most important
- Take a screen shot, save the presentation or take a photo and email it to [ar@aqua.dtu.dk](mailto:ar@aqua.dtu.dk)

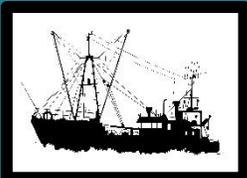

**End-user  
driven  
advice**

**My advice base.**

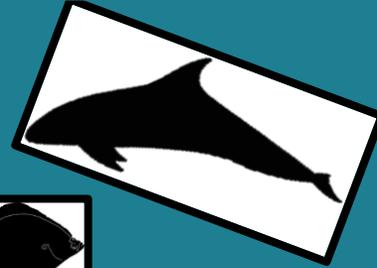

**I selfidentify as:**
